- Shipments planning, arrangement and control
- Documents preparation
- Shipment process improvements, including automation (with Excel)
- Related departments and suppliers control, supporting teamwork

About me

I am curious, open to new things, love to learn and always pay attention to what I do. I am communicative and good at formal logic.

In my spare time, I grow plants, take care of two cats, and spend time on my own various projects like furniture making or design of hydroponic tower powered by solar energy. I also like travelling and playing board games.
